Introduction

Welcome to Webectak, a privately held enterprise registered under number 2024/422881/07, and established by Alain Kitumaini. Webectak specializes in delivering web development and computer science expertise to emerging professionals, alongside a range of supplementary services designed to promote business growth. Since its inception in July 2024, Webectak has demonstrated commendable performance and growth potential in recent months.

Mission and Vision

➔ Mission

Our mission is to engage in collaboration and enhance opportunities within the workplace, and this collaboration is essential to achieving that objective.

➔ Vision

We envision providing opportunities for the youth who will be part of our journey, creating an environment that will contribute to a reduction in the unemployment rate.

Project
execution

Learning Environment Conditions

➔ Training

- Facilitators who will assist us during the program will require training prior to being granted access to the facilitator portal.

➔ Students access

- Students are required to submit a certified copy of their identification document or passport.

➔ Facilitator access

- Facilitators will need to collaborate with the webectak administration team to obtain access.

➔ Students grading

- Students will be evaluated according to a criteria list that will be provided as we advance with the project.
- Each facilitator will concentrate on the module to which they have been assigned.
- We anticipate the opportunity to convey further information.

Project Shares

➔ Webectak Collaboration Share

Webectak, we are currently comfortable operating with an 80% margin, as we need to account for the expenses required to maintain the continuous operation of the project. Additionally, we are evaluating the workload that will arise as this collaboration takes place within our facilities. Please note that profits will be allocated after all employees participating in the program have received their compensation.s Webectak, we are comfortable with 80% due to the expenses we must cover to ensure the continuous operation of the project. Additionally, we are considering the workload we will be shouldering as this collaboration unfolds within our facilities.Take into account Profilts will be shared after facilitatators employees who are part of the program have been paid

➔ ImentorU foundation Collaboration Share

As the ImentorU Foundation, we are pleased to offer you a 20% profit share in recognition of the support you are willing to provide to Webectak. ImentorU is permitted to recruit facilitators to join the Webectak initiative, should you choose to do so. Profit distribution will occur after all employees participating in this program have received their compensation.
